

## Medically therapeutic with sophisticated good looks

The unique Back Saver wallet is sleek and trim. You'll find it for sale in pro shops and upscale stores as a high quality, high fashion wallet. TPK uses only full grain leather in the Back Saver Wallet—the finest leather available. In addition to its durability, full grain leather retains its natural markings and develops an elegant burnish with use.

- Folds flat when full
- 60% thinner than regular wallets
- Gold plated clip securely holds bills
- Four leather slots hold up to 24 cards
- Carried comfortably in front pocket
- Full grain leather—the finest grade leather available

Four slots on the Back Saver Wallet help organize credit cards, licenses, and business cards. Bills and receipts are held in place with an interior gold-plated clip.

The TPK Back Saver Wallet™ is recommended by the Congress of Chiropractic State Associations to help eliminate billfold sciatica.

## Back Saver Wallet™ and Fine Leather Goods

All TPK products are cut from the highest grades of leather; full grain and top grain. Superior durability and good looks ensures years and years of continual use.

- **Checkbook Wallet Plus** for checkbook, register, business cards, credit cards, and pen.

- **Card Holder** for business cards and photographs.

# TPK

## Back Saver Wallet™

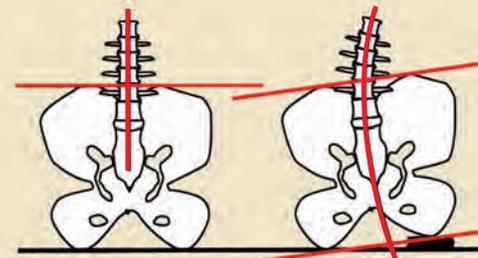

### Help Prevent and Eliminate Back and Neck Pain!

US PATENTS  
D436,252 and 6,435,236

Made in USA

### Stop Sitting on the Problem!

Wallet Sciatica is a medical diagnosis recognized by the Centers for Disease Control

The TPK Back Saver Wallet™ is recommended by the Congress of Chiropractic State Associations to help eliminate billfold sciatica.

# No More Bulk!

Smaller than a wallet. More than a money clip. The Back Saver Wallet holds all your bills, up to 24 cards and still folds flat and thin. This allows you to carry it in your front pocket in comfort and style. It also fits neatly in a shirt or jacket pocket.

**Each Wallet is Holding  
18 Cards and 18 Bills**

**Standard Wallet**

**Back Saver Wallet™  
Folds Thin and Flat**

US Pat.# D436,252 and 6,435,236

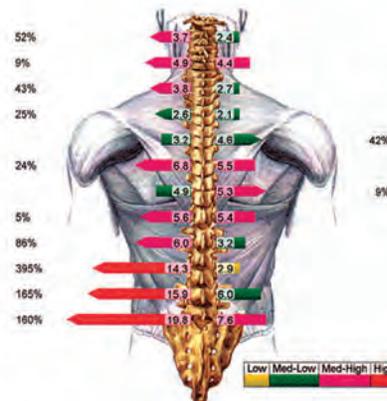

*"This is the best full-size wallet for preventing back, hip and leg problems. Bar none. Bulky wallets can create misalignment of the lower back and hips, and can even result in compression of the sciatic nerves supplying the legs. The Back Saver Wallet eliminates these problems because it fits comfortably in your front pocket."*

Leading Chiropractic Orthopedist

# No More Back and Neck Pain!

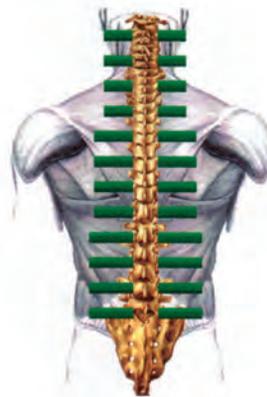

## Muscle Stress Measurements in Back and Neck

UNBALANCED BODY  
With wallet in right rear pocket

Values expressed in microvolts (uV)

BALANCED BODY  
No wallet in pocket

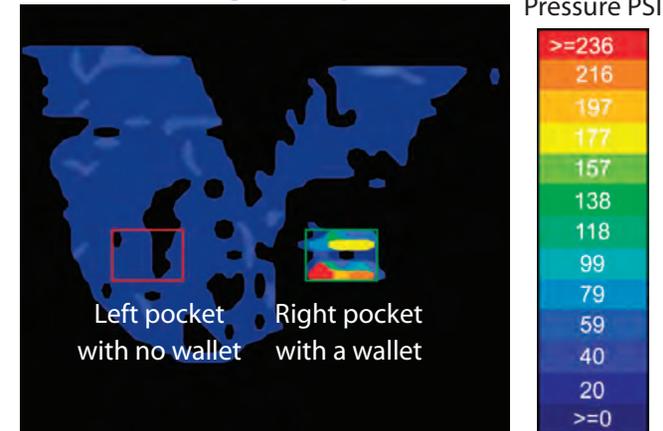

Chiropractors tell their patients to remove their wallet when sitting, or not to carry a wallet in their back pocket at all.

# Muscle Balance for Better Blood Circulation!

Muscle balance is a critical factor in overall health and well-being. When stress is placed upon your body and is left untreated, the result can be a long-term health problem. Sitting on a bulky wallet is a preventable cause of painful sciatica. A wallet acts like a wedge, raising one side of the pelvis, and the spine is forced to compensate for the resulting pelvic imbalance. This often irritates the sciatic nerve, causing problems that can run the length of the nerve from the lower back, through the buttocks and down the legs.

## Pressure measurement with wallet in right back pocket.

**Deep Vein Thrombosis (DVT)** can be caused by sitting on a wallet. DVT causes 200,000 deaths annually in the USA.

## What is deep vein thrombosis?

Deep vein thrombosis (DVT) is a blood clot (thrombus) in a deep vein, usually in the legs. These clots are dangerous because they can break loose and then travel through the bloodstream to the lungs, causing a pulmonary embolism. A pulmonary embolism is often life-threatening. DVT can also cause long-lasting problems. DVT may damage the vein and cause the leg to ache, swell, and change color. It can also cause leg sores.
